

# Some Ethical principles

*Patrice Koehl*  
*Computer Science, UC Davis*

# Ethical principles

# Ethical principles

***The two main goals of academic institutions:***

**-Dissemination and creation of knowledge**

**-fair assignment of credit for the learning and the work**

# Ethical principles

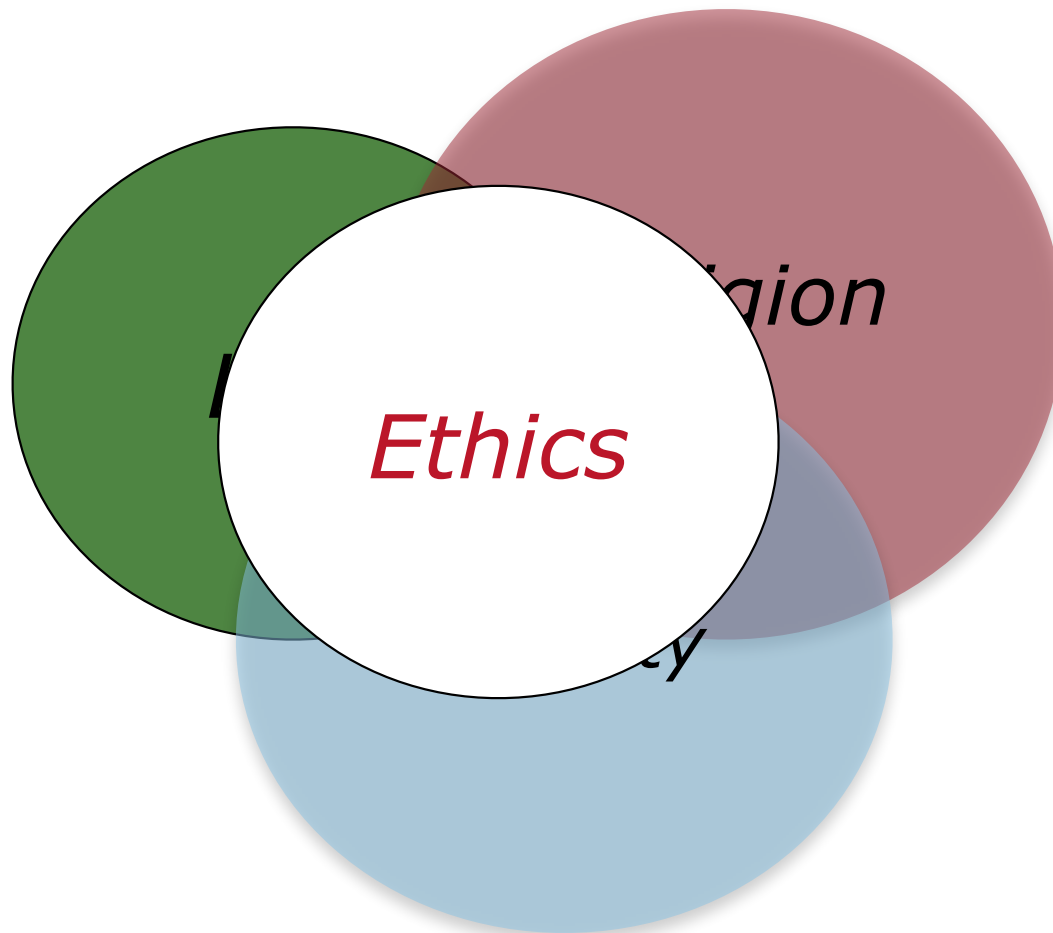

## *Do's and Don't's:*

- Plagiarism** : copying someone else's work and attempting to pass it off as one's own work
- Hiring someone to do your work**
- Using work without proper attribution**
- Using work with proper attribution, but **relying exclusively on such work rather than developing one's own solutions**

# Ethical principles

# Ethical principles

# Morals vs Ethics

- **Morals** – Principles or habits relating to right or wrong conduct, based on an individual's own compass of right and wrong.
- **Ethics** – Rules of conduct in a particular culture or group recognized by an external source or social system. For example, a medical code of ethics that medical professionals must follow.
